

# Medical English for the Spanish-Speaker

**Improve your English at the same time as you diagnose and treat patients!**

**A**re you training students from a Spanish-speaking country to be LVNs, nurse's assistants, paramedics, or other types of medical professionals? As the world gets smaller, it is becoming much more common to have medical professionals with limited English skills treating English-speaking patients. We have a practical book that will help your Spanish-speaking students learn medical English faster!

**D**octor in my Pocket—Spanish has over 400 carefully ordered medical phrases divided into 12 useful sections such as: General Questions, Pain, Chest Problems, Abdominal Problems, Ob/Gyn, etc. Medical phrases are either commands or yes-no-I don't know questions that range from: "Touch the part of the body that bothers you," to "Do you have chest pain?" to "Have you had a seizure?"

**A**ll your students will need to know to use the Doctor in my Pocket—Spanish is how to say three simple phrases in English: "Yes," "No," and "I don't know." Since the phonetics are designed to allow the native Spanish-speaker to pronounce English correctly, as they use the book to diagnose and treat patients they will be improving their English.

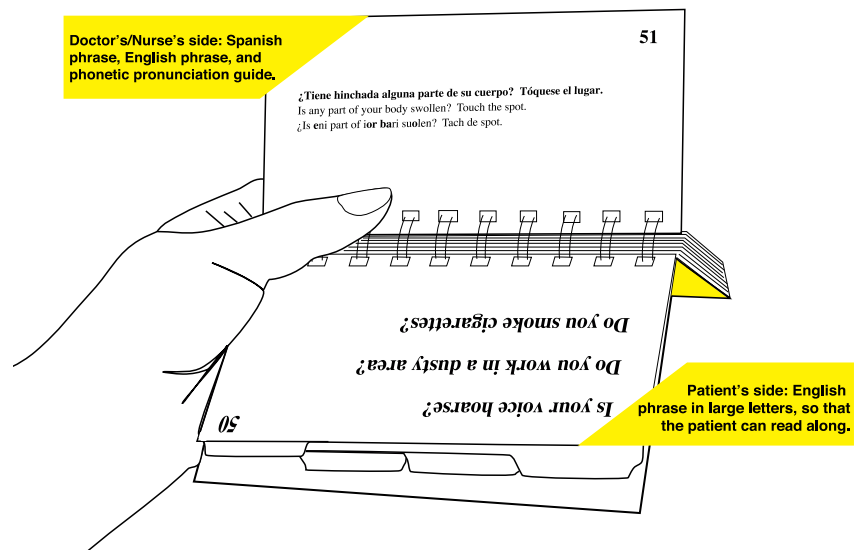

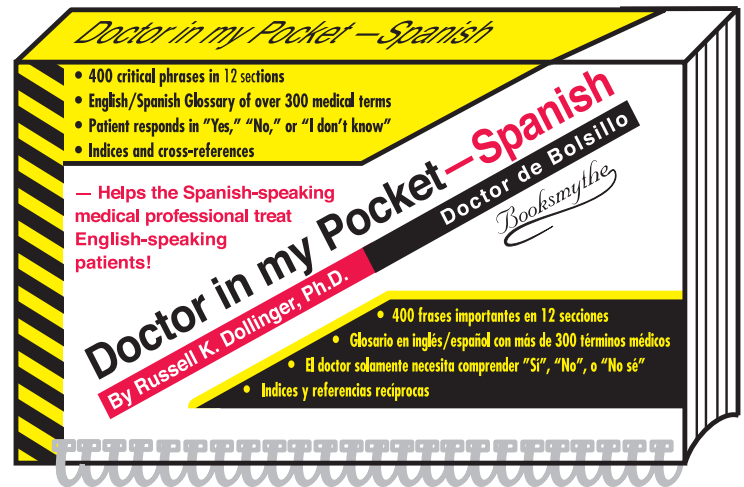

## Doctor in my Pocket—Spanish
